Value via projects

PMP® Academy

Description

Benefits of participating in PMP® Academy

- Gain insights into the full project management process, both theoretically and through real-life project examples
- Acquire practical knowledge of tools and techniques used at every stage of project management
- Understand the processes and dependencies affecting the course of a project, develop skills in planning, task delegation, and progress monitoring
- Improve soft skills necessary for fostering positive relationships with the project team and stakeholders
- Participate in group exercises that allow you to apply learned methods in practice and exchange the experience with the instructor and the group
- Prepare for certification and develop the ability to solve tasks on the PMP® exam to obtain the PMP® certificate

Trainings included in the PMP® Academy

Module I – Managing Projects in Organizations
Module II – Scope, Schedule and Cost Management
Module III – Risk, Quality and Procurement Management
Module IV – Resource, Communication and Stakeholder Management
Module V – Preparation for the PMP® exam

This training is recommended for

- Practicing project managers who want to systematize knowledge and improve project management processes
- Members of project teams who want to improve competencies and learn practical tools for their work
- Management overseeing projects

- Candidates for PMP® certification

Languages and locations

Training sessions are conducted in Polish or English, both online and in-class. Regardless of the chosen form, we guarantee high quality of teaching and a strong focus on practical aspects of project management. We also offer closed training, adjusting location and program to company's needs.

Delivery Guarantee

Training is confirmed 14 days in advance. If the minimum number of participants is not met, the training may be postponed or canceled. Participants who paid earlier can choose a new date, a different topic, or a refund.
