Participants **after completing the training:**

- They can identify project opportunities and threats and plan strategies to respond to them.
- They have comprehensive knowledge in the area of quality management, which translates into improved standards of projects.
- They are prepared to build lasting and beneficial relationships with suppliers.
- They have a certificate of completion of training from an accredited PMI® partner.

Locations:

Risk, Quality and Procurement Management training is available in the form of: **online** and **in class**. During the workshops, we discuss topics covered in the PMBOK Guide 7th Edition and supplement textbook knowledge **practical solutions** and **examples supported by many years of experience**.

Regardless of the chosen format or place, we focus on presenting the practical aspects of project management. We also organize closed training courses at the individual request of the organization, adapting the location and scope to the client's needs.

The training is the third module of the PMP® Academy – a program that thoroughly prepares you for the role of an effective project manager and international prestigious certifications. Join the Academy if you want to learn to use the best global practices. You will learn more about the Academy [here](#).
