Managing Projects in Organizations

This training is valuable both for individuals taking their first steps in professional project management and for experienced project managers who have so far worked more intuitively and wish to systematize their approach based on best international practices.

During the training, participants are guided through the complete project management cycle. We cover 10 knowledge areas, introduce key roles and concepts related to project management, and facilitate engaging exercises and case studies to reinforce new solutions. We place a strong emphasis on preparing participants to apply the acquired skills practically within their own organizations.
