

Risk, Quality and Procurement Management

During the training, we thoroughly discuss issues related to project risk identification, analysis and management, quality planning and improvement, and effective procurement coordination.

We dedicate the training to candidates who already have a basic knowledge of project management and want to strengthen their competencies. The training will also be valuable for experienced project managers who want to learn new tools and improve their operations.

Participants learn **methods and tools for quality assurance**, quality **cost analysis**, and **risk management techniques**, with a focus on both qualitative and quantitative risk assessment methods. Additionally, they discuss issues related to **contract management, contract billing**, and establishing and maintaining **relationships with suppliers**. The **exercises** and **case studies** conducted during the training will allow participants to apply the acquired skills **in practice**.
